

NEW

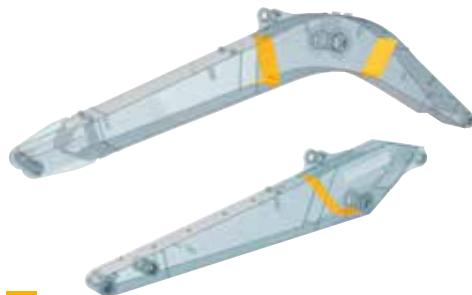

HYDRAULIC EXCAVATOR | JS500 LC

Max engine power: 228kW (305hp) Operating weight: 46147kg/47090kg

JCB

PERFORMANCE AND PRODUCTIVITY.

BEFORE YOU BUY AN EXCAVATOR, YOU NEED TO KNOW IT'S GOING TO BE TOUGH ENOUGH TO PERFORM ANY JOB YOU ASK OF IT. FORTUNATELY, WITH A JCB JS500, STRENGTH AND DURABILITY COME AS STANDARD.

1

2

Boom and dipper.

1 A JCB JS500's reinforced boom and dipper is made of high tensile strength steel, with internal baffle plates for long life durability. In addition we fit heavy-duty wear strips at the dipper end for increased durability.

2 Our advanced manufacturing and assembly processes produce high precision and quality assembled components.

Componentry.

3 JCB JS500s boast the best components in the industry, including Isuzu engine, ITM running gear, Kawasaki pumps and Kayaba main control valves.

We use Finite Element Analysis with extensive rig and endurance testing to make key components last longer.

3

3

**UNEARTHED: KEY FACT**

The JCB JS500 turret is welded to both the upper and lower undercarriage frame.

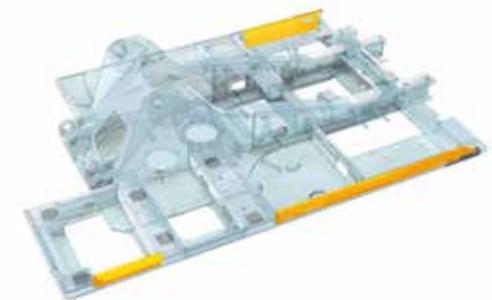

Structural strength.

- 4** The new retractable undercarriage of the JS500 combines ease of transportation with great stability.

The JS500 undercarriage uses a third upper roller which distributes the chain evenly and reduces shock loads.

- 5** Access and egress have been improved by using twin step arrangements.

- 6** Our stiff, durable door design gives great strength and rigidity.

**4****6****5****6**

MAXIMUM PRODUCTIVITY, MINIMUM SPEND.

IT'S MORE IMPORTANT THAN EVER TO SAVE MONEY AND TIME; THE JCB JS500 IS DESIGNED TO MAKE THE MOST OF BOTH.

Upping output.

- 1** With up to a massive 270kN of bucket tearout and fast cycle times, the JS500 is extremely productive in all applications.
- 2** Simultaneous tracking and excavating is smooth and fast with an intuitive multifunction operation.

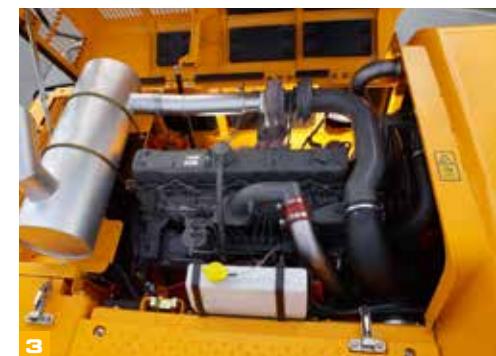

Efficiency.

Advanced hydraulic technology ensures that the machines always starts in idle for maximum fuel efficiency, contributing to fuel savings.

2

Optimised hydraulic pump settings and spool configuration within the main valve block, only delivers the required oil flow, preventing wasted energy.

3 Tier II compliant Isuzu engine benefits from a robust mechanically controlled fuel system, enabling it to work in extreme conditions worldwide. The high power rated engine of 228kW, giving maximum performance at all times.

UNEARTHED: KEY FACT
To save fuel, JCB Auto-Idle technology automatically reduces engine speed when hydraulics aren't in use.

Stability, hydraulics and attachments.

- 4** JCB's innovative hydraulic regeneration system means oil is recycled across the cylinders for faster cycle times and reduced fuel consumption.
- 5** The JCB JS500 has cushioned boom and dipper ends to prevent shock loadings, protect your machine and increase operator comfort.
- 6** The JCB JS500 has a solid, stable work platform for fast cycle times.

For ultra versatility, JCB offers a full list of auxiliary pipework options including hammer, auxiliary, merged and low flow.

A COMFORTABLE FAVOURITE.

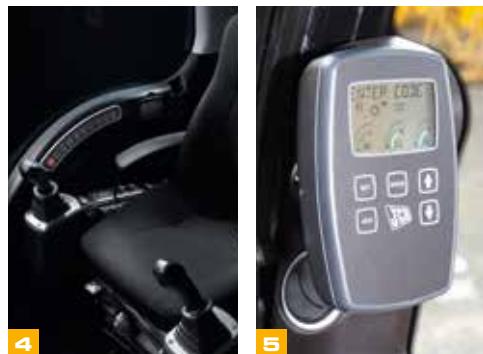

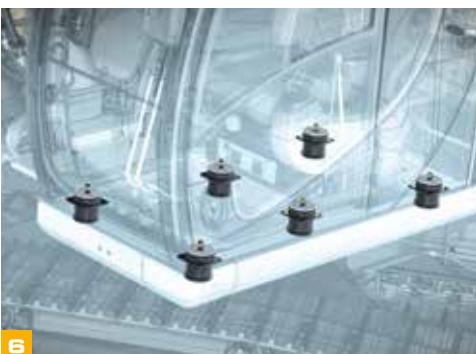

JCB EXCAVATORS ARE DESIGNED AROUND THE OPERATOR. THAT'S GOOD FOR THEM BUT EVEN BETTER FOR YOU; AFTER ALL, GREAT COMFORT AND EASE OF USE EQUALS GREAT PRODUCTIVITY.

Visibly better.

1 A 70/30 front screen split gives JCB JS500's excellent front visibility. A clear view of the front right track provides easy, safe trench digging and manoeuvring.

A balanced slew and electronic/hydraulic controlled slew braking give speed and precision.

**3****4****6**

Even more comfort.

- 3** JCB JS500's have a spacious storage tray behind the operator's seat.
- 4** Function switches are easy to reach and include the heater and climate control panels, while the side unit doubles as part of the immobiliser code selector.
- 5** The easily-accessible Advanced Monitoring System can keep tab on a JCB JS500's functions and inputs while different working modes are selected either manually or automatically.
- 6** JCB JS500 cabs use 6 viscous rubber mounts to minimise noise and vibration.
- 7** A large floor area with large high grip pedals give easy and precise tracking.

**7**

LESS SERVICING, MORE SERVICE.

WE'VE DESIGNED THE JS500 TO BE LOW MAINTENANCE AND EASILY SERVICEABLE. WHICH MAKES THEM AFFORDABLE, EFFICIENT AND HIGHLY PRODUCTIVE. HELPING YOU GET THE BEST SERVICE FROM YOUR MACHINE.

Easy does it.

- 1 The air filter on a JS500 is easily accessible, and a double-element construction simplifies cleaning. There is also an optional PowerCore system as shown.
- 2 The filters on a JCB JS500 (engine oil, hydraulic oil and fuel) are centrally located for fast, easy servicing.

SERVICE INTERVALS	
Engine oil and oil filter	Every 500 hours
Hydraulic oil	Every 5000 hours
Hydraulic oil filter	Every 1000 hours

By using graphite impregnated bronze bushes, we've increased the JS500's boom and dipper greasing intervals to 1000 hours for normal applications.

Here to help.

- 3** The easily-accessible Advanced Monitoring System can keep tab on a JCB JS500's functions and inputs while different working modes are selected either manually or automatically.
- 4** Because they're mounted side by side on a JCB JS500, the engine radiator, hydraulic cooler and intercooler can be serviced individually yet cleaned easily.
- 5** Servicing your JCB JS500 with your local main dealer and our trained engineers can minimise downtime. Order genuine JCB parts online and, in 95% of cases, they'll be with you next day.

4

5

THE SAFE CHOICE.

ON-SITE SAFETY IS CRUCIAL, SO WE'VE DESIGNED THE JS500 TO INCORPORATE AS MANY CUTTING EDGE SAFEGUARDS AS POSSIBLE. IN SHORT, YOUR OPERATORS ARE IN SAFE HANDS.

1 JCB JS500's bonnet opens front-to-rear for easy and safe engine service access.

2 JCB's Safety Lever Lock fully isolates hydraulic functions to avoid unintended movements. Our 2GO system means a JCB JS500 can only be started in a safe locked position via two separate inputs.

3 JCB JS500s have a large glass area and low bonnet line for superb visibility.

4 A JCB JS500's steps and platforms have anti-slip punched steel plates for optimum grip, even in wet or icy conditions. Bolt-on plates have recessed bolts to reduce trip hazard.

5 JCB's optional rear-view camera displays uninterrupted rearward views on the monitor.

6 Your JCB comes equipped with a full set of side and rear view mirrors for all round visibility and safety compliance.

7 Partial handrails come as standard on the JS500.

ENGINE

Model	Isuzu AA-6SD1 TC.
Type	Water cooled, 4-stroke, 6-cylinder overhead cam vertical in-line, direct injection, turbocharged diesel. Tier II low emission with air to air intercooling.
Net power (ISO 3046-INF)	228 kW (305 hp) @ 2000 rpm.
Displacement	9,839 Litres.
Bore/stroke	120mm x 145mm.
Air filtration	Dry element with secondary safety element and in-cab warning indicator.
Starting system	24 volt.
Batteries	2 x 12 volt.
Alternator	24 volt, 50 amp.

TRACK DRIVE

Type	Fully hydrostatic, epicyclic gearbox, three speed with autoshift.
Service brake	Hydraulic counter balance valve to prevent overspeeding on gradients.
Park brake	Disc type, spring applied, automatic hydraulic release.
Gradeability	70% (35 degree) continuous.
Travel speed – high	4.65 km/h.
Travel speed – mid	2.82 km/h.
Travel speed – low	1.96 km/h.
Tractive effort	36,660 kgf.

EXCAVATOR END

The EMS (Easy Maintenance System) is a revolutionary lubrication system that radically simplifies maintenance. Using the graphite impregnated bronze bush's, it is possible to extend the excavator end lubrication intervals to 1000 hours from 50 hours. Monoboom is standard on the JS500 along with a choice of 3 dipper lengths to suit the requirements of reach, dig depth, loadover height and tearout. Reserve strength is built into the fully welded structures for hydraulic hammer's and other tough operations. Heavy-duty reinforced bucket tipping links are provided as standard.

CAB

Excellent digging, loading and positioning visibility results from the careful design of front, side and roof lights. All screens are tinted to improve in cab conditions. Fully opening front screen is very smooth to operate and as the lower screen is stored in rear of cab. Fresh air ventilation available from opening door window, opening slot in front screen and fully opening front screen. Parallelogram wash wiper for upper screen ensuring good wiped area for maximum visibility. Wiper motor is fitted in the left hand side of the roof screen so as not to affect bucket visibility when loading. Optional lower screen wiper available. Fresh air ventilation and heater with windscreen demister. Infinitely variable blower speed, temperature and recirculation control. Optional climate control. Fully adjustable deluxe suspension seat with arm rest adjustment and backrest recline. Optional radio with digital tuner fitted into the roof lining for maximum protection. Conveniently placed radio mute button incorporated into lower console. 12v power point and mobile phone holder built into the right hand console. Courtesy light can be operated from ground level and is illuminated for five minutes or until switched off improving operator access at night. Cab mounted roller blind protects operator from sun's glare through front or top screens.

HYDRAULIC SYSTEM

A variable flow load sensing system with flow on demand, variable power output and servo operated, multi-function open centre control.

Pumps

Main pump 2 variable displacement axial piston type.

Maximum flow 2 x 346 L/min.

Servo pump Gear type.

Maximum flow 30 L/min.

Control valve

A combined four and five spool control valve with auxiliary service spool is standard. When required, twin pump flow is combined to boom, dipper and bucket services for greater speed and efficiency.

Relief valve settings

Boom/Arm/Bucket 319 bar.

With power boost 348 bar.

Swing circuit 279 bar.

Travel circuit 320 bar.

Pilot control 44 bar.

Hydraulic cylinders

Double acting type, with bolt-up end caps and hardened steel bearing bushes. End cushioning is fitted as standard on boom, dipper and bucket rams.

Dimensions

	Boom	Dipper	Bucket
Bore	160mm	180mm	160mm
Rod	110mm	130mm	110mm
Stroke	1580mm	1910mm	1306mm

Filtration

The hydraulic components are protected by the highest standard of filtration to ensure long hydraulic fluid and component life.

In tank	150 micron, suction strainer.
Main return line	10 micron, fibreform element.
Plexus bypass line	1.5 micron, paper element.
Pilot line	10 micron, paper element.
Hydraulic hammer return	10 micron, reinforced microform element.

Cooling

Cooling is provided via a full return line air blast cooler with anti-block wavy cooling fins.

AMS – ADVANCED MANAGEMENT SYSTEM

The JCB Advanced Management System matches engine power and pump output to optimize machine performance in each of the four selectable work modes –

A (Auto) Up to 100% engine power and 100% flow. Gives variable power and speed depending on the operator's input, matching the demand for output and efficiency to the job. Power boost is automatically activated in this mode should hard conditions be encountered. Auto idle cuts in after a period of inactivity (between 5 and 30 seconds as set by the operator).

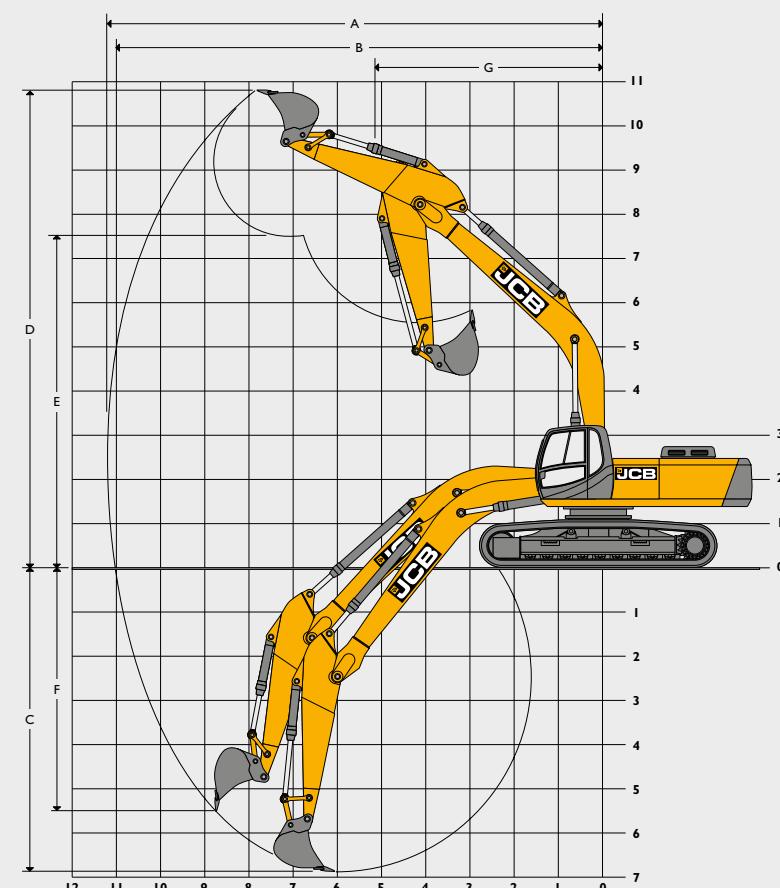

E (Economy) 80% engine power. 95% of hydraulic flow maximises economy while maintaining excellent output.

P (Precision) 55% engine power. 90% of hydraulic flow for fine control of grading operations.

L (Lifting) 55% engine power. 63% of hydraulic flow with permanent power boost for maximum lifting.

WORKING RANGE

	Dipper arm	4.00m	3.36m	2.50m
A	Maximum digging reach	12.31m	11.76m	11.01m
B	Maximum reach on ground	12.07m	11.50m	10.73m
C	Maximum digging depth	8.10m	7.46m	6.60m
D	Maximum digging height	11.14m	10.94m	10.73m
E	Maximum dumping height	8.24m	8.07m	7.82m
F	Maximum vertical cut depth	5.27m	4.70m	3.89m
G	Minimum swing radius	5.02m	5.02m	5.23m
	Bucket rotation deg	182	182	182
	Dipper tearout kgf	16941	19200	23411
	Dipper tearout with boost kgf	18505	20972	25572
	Bucket tearout kgf	27567	27567	27567
	Bucket tearout with boost kgf	30111	30111	30111

Lift capacity front and rear.

- Notes:**
- For lifting capacity including bucket, subtract total weight of bucket or bucket and quickhitch from above values.
 - Lifting capacities are based on ISO 10567, that is: 75% of minimum tipping load or 87% of hydraulic lift capacity, whichever is the less. Lifting capacities marked* are based on hydraulic capacity.
 - Lift capacities assume that the machine is on firm, level ground.
 - Lift capacities may be limited by local regulations. Please refer to your dealer.

Lift capacity full circle.

Lift capacity front and rear.

- Notes:**
- For lifting capacity including bucket, subtract total weight of bucket or bucket and quickhitch from above values.
 - Lifting capacities are based on ISO 10567, that is: 75% of minimum tipping load or 87% of hydraulic lift capacity, whichever is the less. Lifting capacities marked* are based on hydraulic capacity.
 - Lift capacities assume that the machine is on firm, level ground.
 - Lift capacities may be limited by local regulations. Please refer to your dealer.

Lift capacity full circle.

Notes:

- For lifting capacity including bucket, subtract total weight of bucket or bucket and quickhitch from above values.
- Lifting capacities are based on ISO 10567, that is: 75% of minimum tipping load or 87% of hydraulic lift capacity, whichever is the less. Lifting capacities marked* are based on hydraulic capacity.
- Lift capacities assume that the machine is on firm, level ground.
- Lift capacities may be limited by local regulations. Please refer to your dealer.

ONE COMPANY, OVER 300 MACHINES.
